AsciiDoc Document Example

Table of Contents

This is an example of a simple [AsciiDoc](#) document created by John Doe.

First Section

A paragraph followed by a list. It also has a footnote.[1]

- item 1
- item 2

Another paragraph with **strong** significance, an *emphasized* statement, a ***combination*** of both, and an inline `code` example.

See also: [AsciiDoc Syntax Quick Reference](#)

Second Section

Here is an example for source code blocks with a caption:

Listing 1. A most basic Ruby program.

```
puts 'Hello, World!'  ①
```

① A callout for a line of code.

And here is a STEM expression:

$$\lim_{n \to \infty}\frac{n}{\sqrt[n]{n!}} = {\large e}$$

---

[1] AsciiDoc supports unordered, ordered, and description lists.
