Document Title

Table of Contents

An example of a basic [AsciiDoc](#) document prepared by Document Writer.

Introduction

A paragraph followed by an unordered list[1] with square bullets.[2]

- item 1
- item 2
- item 3

Main

Here's how you say "Hello, World!" in Prawn:

Listing 1. Create a basic PDF document using Prawn

```ruby
require 'prawn'

Prawn::Document.generate 'example.pdf' do
  text 'Hello, World!'
end
```

Here is a STEM expression:

$$\lim_{n \to \infty}\frac{n}{\sqrt[n]{n!}} = {\large e}$$

Conclusion

That's all, folks!

---

[1] AsciiDoc supports unordered, ordered, and description lists.

[2] You may choose from square, disc, and circle for the bullet style.
